The services include counselling and mental health services, specialised support for children and teens, refugee and asylum seeker help, pastoral care, support for separating families, social housing and homelessness support. You can donate using the appeal envelope available in our parish, via the special collection which will be taken up next week, donate online at [www.catholiccarevic.org.au](http://www.catholiccarevic.org.au) or call (03) 9287 5513.

A great website for you to have a look through, in particular the recognise and report scams page [www.cyber.gov.au](http://www.cyber.gov.au)

### NAZARETH SOCIAL JUSTICE - CLIMATE CHANGE

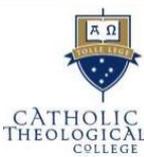

Climate change seems to come and go in our mass media.

Why is this so when it is such a threat to humanity? Well regarded economics writer, Ross Gittins recently wrote in the Age "As every sensible person knows, but prefers not to think about, the most important single challenge we face as a nation is to play our part in achieving the global

goal of reducing emissions of greenhouse gases to net zero by 2050." An article in the non mainstream press - Pearls and Irritations - recently noted - "Corals are the traffic light that warns of planet-wide catastrophe ahead. And the light is glaring red.. Like the wildfires searing the world's forests and grasslands, like the vanishing of insects, birds and large mammals , the corals are another unambiguous signal that humans are riding a runaway train to our own ultimate destruction. Yet our fossil-fuelled governments and corporations heap coals into the engine, keep down their heads and deliberately ignore onrushing disaster." And then comments that the latest bleaching of the Great Barrier Reef may single its end. <https://johnmenadue.com/coral-catastrophe-signals-our-own-undoing/>. Pope Francis has regularly spoken and written about climate change and our responsibility as Christians and as citizens of earth to take action. About two years ago he said to a group of Catholics, that us wealthy would have to think about making sacrifices to give humanity a chance of survival. Things now seem to be getting worse quickly.
